

### Virtual Time Clock Option

- Operates on any industry standard PC or POS (Point-of-Sale) Device, via mouse, POS card reader or touch screen access
- Interfaces with debit card system devices in Education/Government environments
- Accesses the same database as Ethernet clock(s) allowing operators multiple clock-in options in any combination
- Suitable for stand alone PCs, LAN, WAN, Intranet and Internet environments
- Real Time Enforcement of Employee Schedules & Attendance Policy
- Weekly time record and schedule access
- Manager Edit/Adjust Capability

Virtual Time Clock and Managerial Functions available via Authorized Remote Access over the Web.

Employee Interface for TimePro's Virtual Clock-In Option. A Touch Screen interface, via a Point-of-Sale terminal is a cost effective option.

Employees and supervisors can access information on demand on any clock-in device, including a Virtual Clock workstation.
